Personal bio and objective

I am a user-focused Web Developer with a passion for integrating technologies to solve problems and improve existing methods. My background in sales, finance, and office management provides me with a unique perspective on how end-users interact with websites and software platforms. I enjoy approaching programming challenges from different angles and collaborating with others to create meaningful web applications that effectively elevate the user and client experience. My ultimate goal is to provide solutions that are simple and intuitive to clients.
